Bhusan Shrestha

DevOps Engineer | Aspiring Security Engineer

bhushanshrestha2060@gmail.com +977 9761750193 Bhaktapur, Nepal https://bhusanshrestha.com.np/

Summary

DevOps Engineer experienced in deploying and managing applications in Linux-based environments, configuring web infrastructure, automating deployment workflows, and troubleshooting infrastructure and application issues.Works with Docker, Docker Swarm, Kubernetes, Nginx as reverse proxy and load balancer, Cloudflare, SSL/TLS and CI/CD. Strong understanding of software development and backend systems (Node.js, Spring Boot, PostgreSQL, Redis), with a focus on building reliable, secure and scalable deployment environments.

Experience

PortPro Technologies, Inc. Pattipa Marg Uttar, Lalitpur
DevOps Intern August 2026 – November 2026

- Independently designed, built and deployed a todo application as the internship project, made up of a frontend, a backend API and a todo-stats microservice.
- Deployed it as a Docker Swarm stack across manager and worker nodes, with Nginx as the reverse proxy in front of the services.
- Set up a private Docker registry on the manager node to hold the backend and todo-stats images, so every node in the Swarm pulls the same builds.
- Ran the todo-stats service on worker nodes only, over an internal overlay network, and configured start-first rolling updates so new versions go live without downtime.
- Built a CI/CD pipeline for the application.
- Set up monitoring and observability with OpenTelemetry, Prometheus, Grafana, Tempo and Loki, covering metrics, traces and logs.
- Wrote Bash scripts to automate setup and deployment tasks, including the Nginx and PostgreSQL setup.
- Wrote a step-by-step deployment guide so the whole setup can be repeated from scratch.

Education

Himalayan Whitehouse International College BIT (Bachelor in Information Technology)
2022 – 2026

Seabird International Secondary School +2 (Computer Science – Management Stream)
2020 – 2022

Advanced Academy Secondary School SEE (Secondary Education Examination)
2020

Projects

Todo Application - Docker Swarm Deployment

Todo application deployed as Docker Swarm microservices behind an Nginx reverse proxy, with a CI/CD pipeline, Bash automation scripts and observability through OpenTelemetry, Prometheus, Grafana, Tempo and Loki. Includes setup scripts and a written deployment guide.
https://github.com/Bhusan-Shrestha/todo-app

Movie Streaming Platform

Full-stack movie streaming site with a React.js frontend and a Java Spring Boot REST API, with search and pagination.
https://github.com/Bhusan-Shrestha/Movie-Streaming-Website

Movie-watchlist-API

REST API built with Node.js, Express and PostgreSQL (Prisma ORM), with JWT-based authentication.
https://github.com/Bhusan-Shrestha/Movie-watchlist-API

Business Sales Prediction

Full-stack BI system for sales and inventory analysis, with XGBoost sales forecasting and an AI chatbot.
https://github.com/Bhusan-Shrestha/Power-BI-using-XGBoost

Skills

DevOps & Infrastructure

Linux, Docker, Docker Compose, Docker Swarm, Kubernetes, Terraform, Ansible, Nginx, Git/GitHub, CI/CD, Bash, Networking, VPS deployment

Monitoring & Observability

Grafana, Prometheus, Loki, Tempo, OpenTelemetry

Cloud & Deployment

AWS, Cloudflare, Containerized deployment, Load balancing, Reverse proxy, SSL/TLS

Backend & Development

Node.js, Express, NestJS, Java Spring Boot, PHP, REST APIs

Databases

PostgreSQL, MySQL, MongoDB, Redis

Frontend

React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS

Soft Skills

Troubleshooting & Problem-Solving

Finds the cause of infrastructure and application problems, from failed deployments and container errors to network and proxy issues.

Communication & Team Collaboration

Explains technical work clearly and works with teammates on shared projects.

Self-Directed Learning

Learns new tools independently and puts them to use in working projects, such as the Docker Swarm and monitoring stack.

Attention to Detail

Careful with configuration, testing and debugging.

Awards

Outstanding Design Skills — February 2025
Whitehouse Innovator
Awarded by Whitehouse Innovator for outstanding design skills at the Frontend Design Fest.

2nd Position, IT Fest 2081 — March 2025
ANNFSU Himalayan Whitehouse International College Committee
Second position at IT Fest 2081, held on 24 and 25 March 2025 at Himalayan Whitehouse International College.
